Contents Volume 23

Research Papers

S. Mitra and E.V. Fraizer, Effects of explicit sway-minimization on postural–suprapostural dual-task performance 1

T.K.T. Wong and R.Y.W. Lee, Effects of low back pain on the relationship between the movements of the lumbar spine and hip 21

K.B. Cheng and M. Hubbard, Optimal jumping strategies from compliant surfaces: A simple model of springboard standing jumps 35

H. Van Waelvelde, W. De Weerdt, P. De Cock and B.C.M. Smits-Engelsman, Aspects of the validity of the Movement Assessment Battery for Children 49

Discussions

B.H. Repp, Comments on "Rapid motor adaptations to subliminal frequency shifts during syncopated rhythmic sensorimotor synchronization" by Michael H. Thaut and Gary P. Kenyon (Human Movement Science 22 [2003] 321–338) 61

M.H. Thaut and G.P. Kenyon, Response to Bruno Repp's "Comments on 'Rapid motor adaptations to subliminal frequency shifts during syncopated rhythmic sensorimotor synchronization' by Michael H. Thaut and Gary P. Kenyon (Human Movement Science 22 [2003] 321–338)" 79

Research Papers

D. Delignières, L. Lemoine and K. Torre, Time intervals production in tapping and oscillatory motion 87

M. Schmid, S. Conforto, D. Bibbo and T. D'Alessio, Respiration and postural sway: detection of phase synchronizations and interactions 105

C.A. McGibbon, D. Goldvasser, D.E. Krebs and D. Moxley Scarborough, Instant of chair-rise lift-off can be predicted by foot–floor reaction forces 121

B.D. Ulrich, V. Haehl, U.H. Buzzi, M. Kubo and K.G. Holt, Modeling dynamic resource utilization in populations with unique constraints: Preadolescents with and without Down syndrome 133

P. Bonifacci, Children with low motor ability have lower visual-motor integration ability but unaffected perceptual skills 157

G. Robert, N. Gueguen, P. Avogadro and L. Mouchnino, Anticipatory balance control is affected by loadless training experiences 169

doi:10.1016/S0167-9457(04)00128-9

P.S. Haibach, G.L. Daniels and K.M. Newell, Coordination changes in the early stages of learning to cascade juggle 185

K. Hashizume and T. Matsuo, Temporal and spatial factors reflecting performance improvement during learning three-ball cascade juggling 207

Special Issue

Sensorimotor Coordination: Behavioural Modes and Neural Mechanisms

Edited by W.D. Byblow and R.G. Carson

Guest editorial

W. Byblow and R. Carson, Sensorimotor Coordination: Behavioural modes and Neural mechanisms 235

Aiming and Interception

C. Camachon, M. Buekers and G. Montagne, Is the learning of goal-directed displacement effector-independent? 239

Neural and Musculoskeletal Dynamics

P.D. Neilson and M.D. Neilson, A new view on visuomotor channels: The case of the disappearing dynamics 257

A. Ridderikhoff, C.E. Peper, R.G. Carson and P.J. Beek, Effector dynamics of rhythmic wrist activity and its implications for (modeling) bimanual coordination 285

R. Huys, A. Daffertshofer and P.J. Beek, Multiple time scales and subsystem embedding in the learning of juggling 315

Posture and Locomotion

T.S. Miles, S.C. Flavel and M.A. Nordstrom, Stretch reflexes in the human masticatory muscles: A brief review and a new functional role 337

V. Weerdesteyn, B. Nienhuis, B. Hampsink and J. Duysens, Gait adjustments in response to an obstacle are faster than voluntary reactions 351

Propriception

U. Proske, J.E. Gregory, D.L. Morgan, P. Percival, N.S. Weerakkody and B.J. Canny, Force matching errors following eccentric exercise 365

D.J. Edwards, G.W. Thickbroom, M.L. Byrnes, S. Ghosh and F.L. Mastaglia, Temporal aspects of passive movement-related corticomotor inhibition 379

Interlimb Coordination

B.H. Repp, On the nature of phase attraction in sensorimotor synchronization with interleaved auditory sequences 389

C.Y. Hiraga, J.J. Summers and J.J. Temprado, Attentional costs of coordinating homologous and non-homologous limbs 415

S. Riek, The effects of viscous loading of the human forearm flexors on the stability of coordination 431

Motor Development

A.M. Pellegrini, E.C. Andrade and L.A. Teixeira, Attending to the non-preferred hand improves bimanual coordination in children 447

Y. Westenberg, B.C.M. Smits-Engelsman and J. Duysens, Development of unimanual versus bimanual task performance in an isometric task 461

J.P. Piek and M.J. Dyck, Sensory-motor deficits in children with developmental coordination disorder, attention deficit hyperactivity disorder and autistic disorder 475

Movement Disorders

S.G. Brauer, A. Broome, C. Stone, S. Clewett and P. Herzig, Simplest tasks have greatest dual task interference with balance in brain injured adults 489

M.H.G. Verheul and R.H. Geuze, Inter-limb coupling in bimanual rhythmic coordination in Parkinson's disease 503

C.M. Stinear and W.D. Byblow, Impaired modulation of corticospinal excitability following subthreshold rTMS in focal hand dystonia 527

Special Issue

European Workshop on Movement Science

Edited by W.B. Verwey and W.I. Schöllhorn

Editorial

W.B. Verwey and W.I. Schöllhorn, Preface to the EWOMS special issue of Human Movement Science 539

Special Papers

R. Shadmehr, Generalization as a behavioral window to the neural mechanisms of learning internal models 543

A. Wing, A. Daffertshofer and J. Pressing, Multiple time scales in serial production of force: A tutorial on power spectral analysis of motor variability 569

W. Herzog, History dependence of skeletal muscle force production: Implications for movement control 591

J. Perl, A neural network approach to movement pattern analysis 605

S. Athènes, I. Sallagoïty, P.-G. Zanone and J.-M. Albaret, Evaluating the coordination dynamics of handwriting 621

J. Hermsdörfer, E. Hagl and D.A. Nowak, Deficits of anticipatory grip force control after damage to peripheral and central sensorimotor systems 643

C. Peham, T. Licka, H. Schobesberger and E. Meschan, Influence of the rider on the variability of the equine gait 663

C. (Lieke) E. Peper, A. Ridderikhoff, A. Daffertshofer and P.J. Beek, Explanatory limitations of the HKB model: Incentives for a two-tiered model of rhythmic interlimb coordination 673

B.J. Rhodes, D. Bullock, W.B. Verwey, B.B. Averbeck and M.P.A. Page, Learning and production of movement sequences: Behavioral, neurophysiological, and modeling perspectives 699

A.G. Witney, Internal models for bi-manual tasks 747

Research Papers

M.F. Bradshaw, S.J. Watt, K.M. Elliott and P.M. Riddell, The effects of a pre-movement delay on the kinematics of prehension in middle childhood 771

H.J. Choi and L.S. Mark, Scaling affordances for human reach actions 785

A.H. Hansen, D.S. Childress and S.C. Miff, Roll-over characteristics of human walking on inclined surfaces 807

G.M. Earhart and F.B. Horak, Effects of cadence on the acquisition and expression of podokinetic after-rotation 823

R.W. Paine, S. Grossberg and A.W.A. Van Gemmert, A quantitative evaluation of the AVITEWRITE model of handwriting learning 837

O. Krigolson and M. Heath, Background visual cues and memory-guided reaching 861
